

VOXLOG[®]

AUDIO RECORDING and ASSOCIATED DATA

————— Capture Solution —————

Save time

Reduce time spent on minutes and improve transcription precision.

Annotate at any time

Take notes during and after the recordings to add comments or references and quickly identify speakers and events.

Increase productivity

Record from a desktop or laptop computer. Through a search and playback web interface, access recordings anywhere and at any time.

Rechercher rapidement

Quick and easy search for audio files using a precise time reference, even while recording.

VOXLOG®

AUDIO RECORDING AND ASSOCIATED DATA CAPTURE SOLUTION

Voxlog is a voice recording software designed to adapt to different market types including judicial and administrative tribunals, municipal courts and business meetings.

Capture your hearings, add annotations, secure and control access, integrate your roll for hearing search and listen audio files.

Easy to use, Voxlog will help you optimize performance, improve operational efficiency and document your decisions especially.

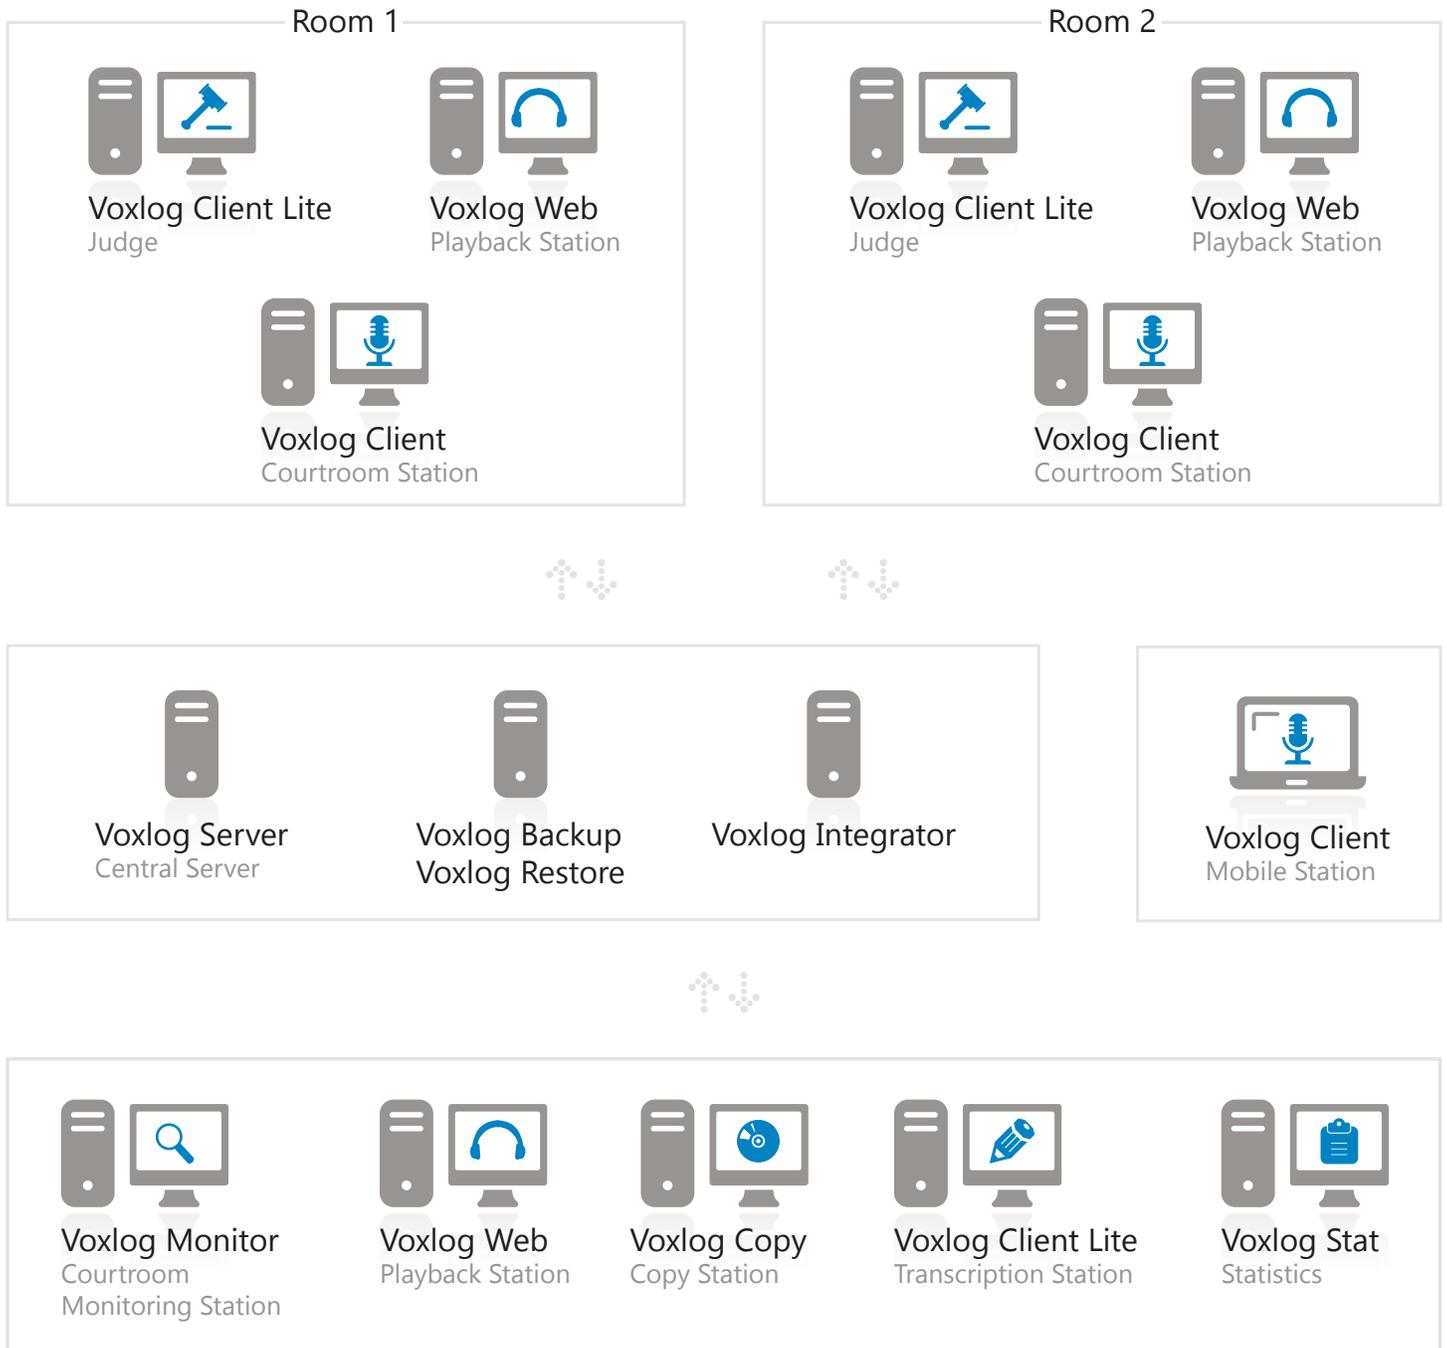

« Voxlog documents your decisions. »

VOXLOG SOFTWARE CONFIGURATION

Should you need audio capture for one room or for thousands of rooms, located in various buildings connected through a local or wide area network, or even for mobile recording, Voxlog is your choice solution.

VOXLOG SUITE SOFTWARE

VOXLOG[®] client

Enables the complete audio capture of a hearing or meeting and the association of information such as the roll for hearing data and the annotations.

- ✓ Record, search and listen
- ✓ Numerous alarm and restriction levels
- ✓ Enables audio capture in a fixed room or on the road
- ✓ Easy to use, complete and accurate: Requires minimal training
- ✓ Foot pedal support
- ✓ General annotations can be managed from any computer

VOXLOG[®] copy

Digital copying including annotations of hearings and meetings for your internal and external customers.

- ✓ Make complete or partial copies
- ✓ Replay software included
- ✓ Invoicing module
- ✓ Allows copying on CD/DVD, USB or other digital formats

VOXLOG[®] client lite

Search and listen audio files as well as give the same permissions to a large group of users in your organization.

- ✓ Add, remove and correct annotations
- ✓ Accessible from a desktop or laptop computer
- ✓ Listen to your hearing or meeting at the right time
- ✓ Listen to the audio files privately and discreetly

VOXLOG[®] server

Enables a secure, stable and reliable communication between Voxlog Client, Voxlog Client Lite, Voxlog Copy and the database (DB) where the data is stored.

- ✓ Secures all authentication and information search
- ✓ Simple approach; licenses can be replaced or moved
- ✓ Numerous databases supported

VOXLOG SUITE SOFTWARE

VOXLOG[®] unique

An all-in-one solution includes the Voxlog Client, Voxlog Server and Voxlog Copy software and available on a desktop or laptop computer.

- ✓ Complete solution: all available from a single computer
- ✓ Easy to install, manage and use
- ✓ Change hearing locations with security and flexibility

VOXLOG[®] stat

Through 6 reports, Voxlog Stat offers a comprehensive view of the physical use of rooms as well as their availability, the number of cases, their duration, and a lot more.

- ✓ Allows resource usage analysis in a hearing setting
- ✓ Gives a clear and precise picture of the hearing/meeting rooms usage
- ✓ Allows better management of physical, budgetary and human resources

VOXLOG[®] player

Voxlog Player is a utility software that facilitates the playback of your hearings or meetings.

- ✓ Does not require any download or installation
- ✓ Direct access to the annotations of court clerks associated to the case

VOXLOG[®] monitor

Monitor the state of your hearing or meeting rooms in real time.

- ✓ Indicates the status (recording, paused, stopped) of each court room in real time
- ✓ Lets you see the status of your court rooms without going anywhere

VOXLOG[®] integrator

For each case heard, Voxlog Integrator enables the integration of roll for hearing information into the Voxlog solution.

- ✓ Simple and efficient roll for hearing integration
- ✓ Adds information to the case file and makes the minutes more comprehensive
- ✓ Facilitates the search for case files

TECHNICAL IMPROVEMENTS

Security

Advanced security measures implementation:
